COUNCIL OF EUROPE DIVISION ON MIGRATION AND REFUGEES – MANDATE

The Division on Migration and Refugees was created within the Directorate General of Human Rights and Rule of Law (DG1) on 1 February 2025 to follow up on the action by the former Special Representative of the Secretary General on Migration and Refugees.

Its mandate includes suggesting assistance and support to member states, particularly through the Network of Focal Points on Migration, seeking, collecting and analysing information on the human rights situation of migrants and refugees, as well as complementing and co-ordinating activities of other relevant Council of Europe bodies and our action with other international partners, notably the UNHCR, the IOM, the EU and its specialised agencies, and other national, regional and international stakeholders, including civil society organisations. The Division on Migration and Refugees represents the Council of Europe in the UNHCR Nansen Refugee Award Selection Committee, as well as in the Consultative Forums of Frontex and of the European Union Agency for Asylum (EUAA).

5. IRREGULAR BORDER CROSSINGS IN EUROPE	21
6. UKRAINIAN REFUGEES	23

Introductory note

Migration has been a continuous feature of human history, shaping societies across centuries. This publication aims to provide an overview of key facts concerning migration at global and European levels. By compiling and presenting the most relevant statistics and trends, it can serve as a resource for evidence-based discussions and decision making.

The data available and included herein indicate that, in recent years, most migratory movements in Europe occur through regular and orderly channels and that there has been an increase of migrant returns from European Union (EU) member states. The figures also show that migration plays a significant role in supporting European economies, helping to meet labour market needs, offset demographic challenges and fill gaps in skills.

It is intended that this “Migration key facts sheet” will be updated regularly and made available on the website of the Council of Europe’s Division on Migration and Refugees, ensuring that the information remains accurate, timely and relevant for the policies and practices of member states and other stakeholders.

Definitions

- ▶ A “migrant” is an umbrella term referring to a person who moves away from his or her place of usual residence, whether within a country or across an international border, temporarily or permanently, for any reason.¹
- ▶ “International migrants” – From the United Nations Department of Economics and Social Affairs (UN DESA) statistical perspective, international migrants are defined by the intersection of two key dimensions: space and time. To be considered an international migrant, a person must have moved across an international border and changed his or her country of residence. In addition, a threshold, usually of 12 months, is used to specify the amount of time a person must have lived continuously in another country to be considered a migrant. The statistical definition of an international migrant makes no reference to the reason for migration or to the legal immigration status of persons changing their country of residence.²
- ▶ “Refugees” are persons forced to flee their own country and seek safety in another country. They are unable to return to their own country because of feared persecution as a result of who they are, what they believe in or say, or because of armed conflict, violence or serious public disorder.³
- ▶ “Asylum seekers” are persons seeking international protection. Their request for refugee status, or complementary protection status,⁴ has yet to be processed, or they may not yet have requested asylum but they intend to do so.⁵
- ▶ “Internally displaced persons”, usually referred to as IDPs, are persons who have been forced to flee their homes by conflict, violence, persecution or disasters, however, they remain within the borders of their own country.⁶
- ▶ “Legal or regular migration” may be defined as migration that occurs in compliance with the laws of the country of origin, transit and destination.⁷
- ▶ “Illegal or irregular migration” refers to the movement of persons that occurs outside the laws, regulations or international agreements from the country of origin, transit or destination.⁸
- ▶ “Assisted voluntary return and reintegration” – Administrative, logistical or financial support, including reintegration assistance, to migrants unable or unwilling to remain in the host country or country of transit and who decide to return to their country of origin.⁹
- ▶ “Voluntary return” – The assisted or independent return to the country of origin or another country, based on the voluntary decision of the returnee.¹⁰

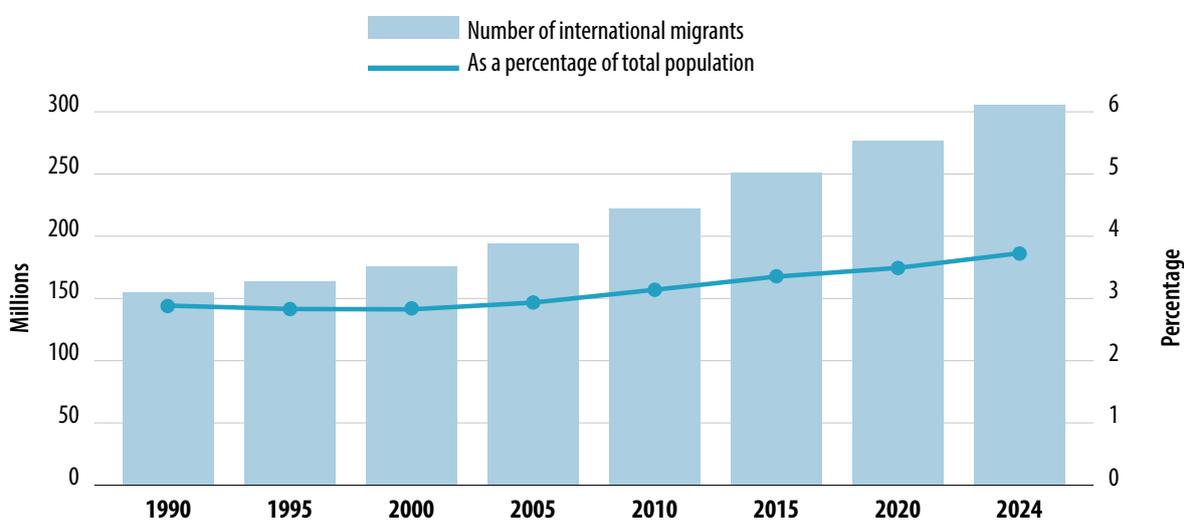

-
1. The term includes a number of well-defined legal categories of persons, such as migrant workers; persons whose particular types of movements are legally defined, such as smuggled migrants; as well as those whose status or means of movement are not specifically defined under international law, such as international students, see www.iom.int/key-migration-terms.
 2. UN DESA (2024), *International migration and sustainable development report*, United Nations publication, p. 28.
 3. The 1951 Refugee Convention defines a refugee as a person who “owing to well-founded fear of being persecuted for reasons of race, religion, nationality, membership of a particular social group or political opinion, is outside the country of [their] nationality and is unable or, owing to such fear, is unwilling to avail [themselves] of the protection of that country”. According to the Office of the United Nations Commissioner for Refugees (UNHCR): “Regional legal instruments in Africa and the Americas have broadened this definition by including people who are compelled to leave their country because of external aggression, occupation, foreign domination, internal conflicts, massive violation of human rights or events seriously disturbing public order”, see www.unhcr.org/about-unhcr/who-we-protect/refugees.
 4. “Complementary protection status” refers to a legal status granted to a person who does not satisfy the definition of refugee under the Refugee Convention but may not return to their country of origin due to a real risk of serious human rights violations.

1. Global data on migration

Global data: international migrants¹¹

United Nations data indicates that over the past six decades, the number of international migrants worldwide increased nearly fourfold, reaching 281 million in 2020.¹² Nonetheless, migrants still represent a relatively small proportion of the global population. According to data from the United Nations, international migrants accounted for just over 3% of the world's population in 1990, and this share gradually increased to approximately 3.6% by 2020.

Figure 1 – Number of international migrants worldwide and as a share of the global population

Source: United Nations (2025).

Table 1 – International migrants worldwide since 1970

Year	Number of international migrants	Migrants as a % of the world's population
1970	84 460 125	2.3
1975	90 368 010	2.2
1980	101 983 149	2.3
1985	113 206 691	2.3
1990	152 986 157	2.9
1995	161 289 976	2.8
2000	173 230 585	2.8
2005	191 446 828	2.9
2010	220 983 187	3.2
2015	247 958 644	3.4
2020	280 598 105	3.6

12. See UN DESA (2024), *International migration and sustainable development*, United Nations Publication.

International migration by region

International migration often takes place within regions, facilitated by geographic proximity and the close economic, social and cultural ties that countries with shared borders or within the same region often enjoy.¹³

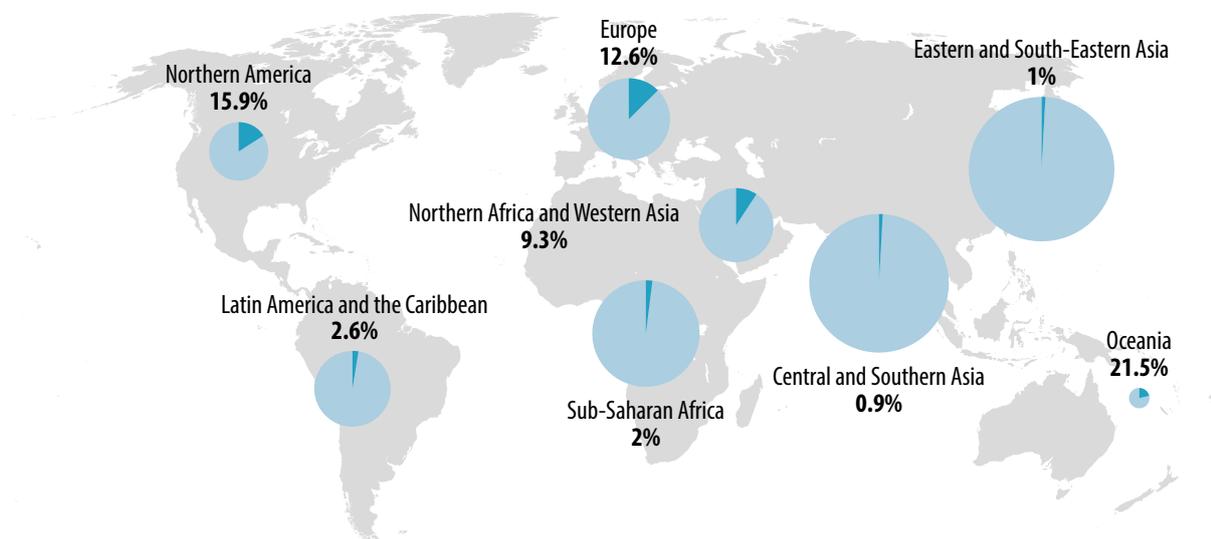

In 2024, nearly half (45%) of all international migrants worldwide were living in their region of origin. Europe had the largest share of intra-regional migration, with 74% of all migrants born in Europe residing in another European country or area. Similarly, 73% of international migrants from Oceania resided within the region, and 64% of all migrants born in sub-Saharan Africa lived in another country or area in the region in 2024.

Table 2 – International migration by region

Region	Number of international migrants (2024)	International migrants as a percentage of the total population of the region
Oceania	9.9 million	21.5%
Northern America	61.6 million	15.9%
Europe	93.9 million	12.6%
Northern Africa and Western Asia	56 million	9.3%
Latin America and the Caribbean	17.3 million	2.6%
Sub-Saharan Africa	25.5 million	2%
Eastern and South-Eastern Asia	23 million	1%
Central and Southern Asia	20 million	0.9%

Source: www.un.org/development/desa/pd/content/international-migrant-stock.

Figure 2 – International migrants as a share of total population by region or destination 2024

Source: www.un.org/development/desa/pd/content/international-migrant-stock.

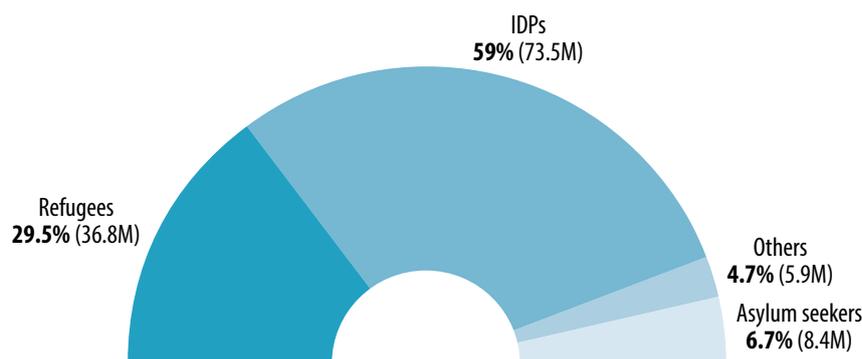

13. Ibid.

Global data: forcibly displaced persons

By the end of 2024, there were 124.6 million forcibly displaced persons worldwide, that is, refugees, asylum seekers, internally displaced persons and persons otherwise in need of international protection:

- ▶ 73.5 million internally displaced persons (due to conflict and violence)
- ▶ 36.8 million refugees
- ▶ 8.4 million asylum seekers
- ▶ 5.9 million other persons in need of international protection¹⁴

Figure 3 – Forcibly displaced persons worldwide (total: 124.6 million)

Source: *UNHCR refugee statistics*.

69% of refugees originate from just five countries:¹⁵

- ▶ Venezuela: 6.2 million
- ▶ Syrian Arab Republic: 6 million
- ▶ Afghanistan: 5.8 million
- ▶ Ukraine: 5.1 million
- ▶ South Sudan: 2.3 million

37% of them are hosted in five countries:¹⁶

- ▶ Islamic Republic of Iran: 3.5 million
- ▶ Türkiye: 2.9 million
- ▶ Colombia: 2.8 million
- ▶ Germany: 2.7 million
- ▶ Uganda: 1.8 million

In total, 49 million are children, which constitutes 40% of the total number.¹⁷ Some 1.8 million returned to their countries of origin or resettled during 2023.

14. The category "Other persons in need of international protection" refers to people who are outside their country or territory of origin, typically because they have been forcibly displaced across international borders, who have not been reported under other categories (asylum seekers, refugees, people in refugee-like situations) but who likely need international protection, including protection against forced return, as well as access to basic services on a temporary or longer-term basis, see UNHCR, [Refugee Data Finder - Methodology](#).

15. Refugees under the UNHCR's mandate and others in need of international protection, excluding refugees under the mandate of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA).

16. Ibid.

17. All forcibly displaced persons.

Table 3 – Forcibly displaced populations by region of destination

Region	Total number of displaced persons	Percentage of the total global displaced population
Middle East and North Africa	24.4 million	20%
East and Horn Africa	23.7 million	19%
The Americas	21.3 million	17%
Europe	18.8 million	13%
Asia and the Pacific	16.3 million	15%
West and Central Africa	10.8 million	9%
Southern Africa	7.8 million	7%

Table 5 – Number of displaced persons in Europe by year

Year	Number of displaced persons in Europe
2020	10 219 235
2021	10 247 412
2022	21 111 022
2023	19 774 081
2024	18 833 235

Sources: *UNHCR Refugee Data Finder, European Commission*.

A fact to consider: at the end of 2021, less than 10% of all the world's refugees were living in the EU. By the end of 2022, as a result of the war in Ukraine, the share of refugees living in the EU increased to more than 20%. At the end of 2023, the share of refugees residing in the EU remained stable compared to the preceding year, standing at 20%. The share of refugees in the EU was 1.7% compared to its total population.

2. Refugees and asylum seekers in Europe

Refugee population in Europe

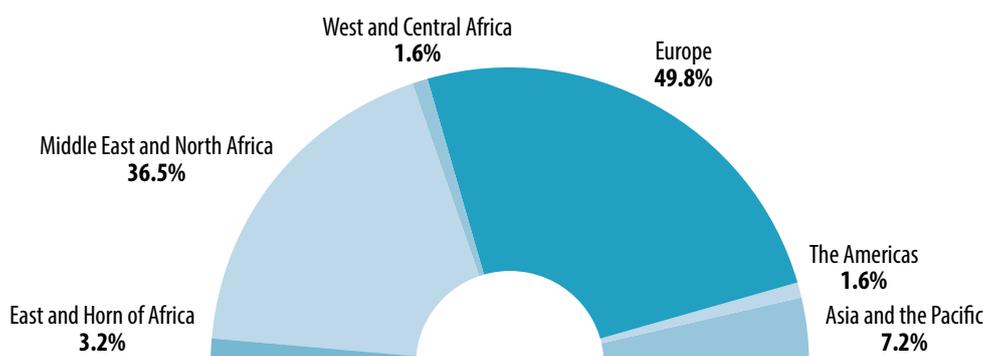

Total refugee population in Europe (2024): 12.01 million.¹⁸

4. International migrants in Europe's labour force

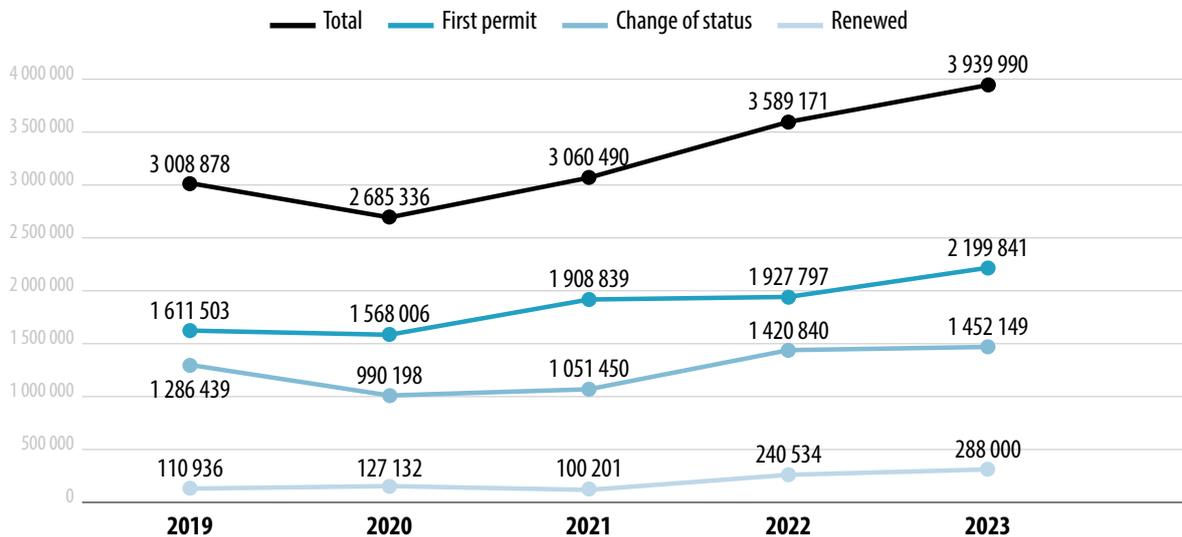

International Labour Organization (ILO) data indicate that from 2013 to 2022 the distribution of international migrants in the labour force by region remained relatively stable. The distribution of international migrants in the labour force in northern, southern and western Europe increased marginally between 2013 and 2022.

Table 12 – Proportion of international migrants in labour force in Europe

Subregion	2013	2017	2019	2022
Eastern Europe	7.6%	8.1%	8.2%	7.8%
Northern, southern and western Europe	14.3%	15.9%	17.0%	17.4%

Migration has been a continuous feature of human history, shaping societies across centuries. By compiling and presenting the most relevant statistics and trends at global and European level the Migration key facts sheet aims to contribute to evidence-based discussions and decision making. This document will be updated regularly and made available on the website of the Council of Europe's Division on Migration and Refugees.

www.coe.int/en/web/migration-and-refugees/

www.coe.int

The Council of Europe is the continent's leading human rights organisation. It comprises 46 member states, including all members of the European Union. All Council of Europe member states have signed up to the European Convention on Human Rights, a treaty designed to protect human rights, democracy and the rule of law. The European Court of Human Rights oversees the implementation of the Convention in the member states.
