EUROPEAN PHARMACOPOEIA REFERENCE STANDARDS (RS)

75 new RSs established in 2015

A collection of 2708 items available: chemical, herbal and biological reference standards and materials and reference spectra.

- ▶ Ph. Eur. Reference Standards are necessary for the application of Ph. Eur. monographs
- ▶ The EDQM laboratory establishes and monitors the fitness for use of Ph. Eur. Standards and Preparations
- ▶ Establishment reports are adopted by the European Pharmacopoeia Commission.

Consult the online catalogue (updated daily):

<http://crs.edqm.eu>

Practical information:

- ▶ Search by catalogue code, reference standard name, monograph number or CAS number to quickly locate the standard you need
- ▶ Batch Validity Statement (BVS) for reference standards enables users to verify, at time of use, the validity of batches supplied
- ▶ Safety data sheets (SDS) and leaflets (where applicable) can be accessed via the Reference Standard catalogue: <http://crs.edqm.eu/>

WHO INTERNATIONAL STANDARDS FOR ANTIBIOTICS (ISA) AND WHO INTERNATIONAL CHEMICAL REFERENCE SUBSTANCES (ICRS)

The EDQM distributes WHO ISA and WHO ICRS:

- ▶ **ISA:** : reference substances for use as primary standards in microbiological testing of antibiotics. ISA can also be used by regional or national pharmacopoeias to establish secondary standards.
- ▶ **ICRS:** primary chemical reference substances established on the advice of the WHO Expert Committee on Specifications for Pharmaceutical Preparations. They are supplied for use in physical and chemical tests and assays described in the International Pharmacopoeia or other WHO quality assurance documents.

Practical information:

- ▶ Safety data sheets (SDS), leaflets and study reports (only for ISA) available online (PDF format):
<https://go.edqm.eu/ISAen>
<https://go.edqm.eu/ICRSen>
